About Me

Once I had an enemy inside my mind, but now it turned into love. It's a thing called programming, especially Web Development. Besides, I always think that what I love in this world is not enough, it can't help me in some circumstance. So, I try to combine my faith with my passion, become a better developer and also religious one.

Programming	JavaScript · PHP · Typescript
Web	ReactJS · NodeJS · ExpressJS · Bootstrap · CSS · Redux · MobX · Expression engine · Laravel · RestAPI · GraphQL
Database	MySQL · MongoDB · Redis
Others	Github · Gitlab · Bitbucket
